

TARUNES K

AI Agent Software Developer | Backend & Agentic AI Systems

Chennai, India | tarunes12@gmail.com | +91 9342595981 | github.com/TARUNES

PROFESSIONAL SUMMARY

AI Agent Software Developer with 2+ years shipping production AI systems end-to-end, from stakeholder scoping to Azure Kubernetes deployment. Specializes in agentic architectures (LangGraph, AutoGen, MCP, multi-agent orchestration), RAG, and scalable backend engineering (FastAPI, Java, microservices). Cut manual engineering effort by up to 40% and API costs by 30% through autonomous incident-resolution and LLM-gateway platforms. Microsoft Certified Azure AI Engineer Associate, currently driving AI adoption and productivity tooling across engineering teams in a telecom enterprise.

CORE SKILLS

- **AI / Agentic Systems:** LangChain, LangGraph, AutoGen, MCP, Multi-Agent Orchestration, RAG, Voice AI, vLLM, LoRA/PEFT, LLM Evaluation, Prompt Engineering, Vector Embeddings
- **Backend & Languages:** Python, Java, SQL, JavaScript, FastAPI, REST API Design, OAuth 2.0, RBAC, Microservices, WebSockets, RabbitMQ, SQLAlchemy
- **Cloud, DevOps & Data:** Microsoft Azure, Azure OpenAI, Azure Kubernetes Service (AKS), Docker, Kubernetes, CI/CD, PostgreSQL, Redis, Qdrant, Neo4j (Knowledge Graphs)
- **Governance & Tooling:** OPA, Presidio (PII Masking), Semantic Caching (RedisVL), Mermaid/Diagram Automation, LLD Generation, Release Automation

PROFESSIONAL EXPERIENCE

AI Agent Software Developer | Ericsson

May 2026 – Present | Chennai, India

- Designed and shipped a release-note automation system from scratch, now adopted team-wide across the organization, eliminating manual release documentation effort.
- Built a Low-Level Design (LLD) generator that auto-derives design documentation from Java codebases, standardizing design output and cutting design-review turnaround time.
- Deliver AI Agent and Java backend engineering for internal platforms, partnering with cross-functional teams to embed agentic AI into existing telecom software workflows.
- Conducted internal GenAI and Agentic AI enablement sessions for 45+ senior engineers, translating LLM concepts into practical workflows for non-AI teams.
- Self-initiated a Voice AI assistant integrated into SDLC workflows as a proof-of-concept demonstrating end-to-end agentic design patterns, and own the mandate to drive AI adoption and productivity across the team, contributing directly to AI-in-telecom initiatives.

Software Engineer | Anunta Technology

Jul 2024 – Apr 2026 | Chennai, India

- Owned the full lifecycle of 2 production AI systems as sole AI engineer - from stakeholder problem scoping through architecture design to deployment on Azure Kubernetes.
- Built Incident Resolver, a production AIOps platform (FastAPI, AutoGen, RAG, Qdrant, Azure OpenAI) that autonomously triages incidents and executes resolution workflows, reducing manual engineering intervention by 40%.
- Engineered DesktopReady, multi-tenant backend microservices for a DaaS platform automating VM lifecycle, user/group management, and monitoring; built DeskMate, a local-inference agentic desktop assistant on vLLM that resolves system anomalies before they escalate.

Software Engineer Intern | Xendworks

Jan 2024 – Jul 2024 | Chennai, India

- Built secure REST APIs (OAuth 2.0, RBAC) and a Flutter application from scratch with direct stakeholder involvement across the full requirements-to-delivery cycle.
- Shipped a production app that scaled to 1,000+ active users, driving 20% engagement growth.

SELECTED PROJECTS

Aegis - LLM Gateway & Governance Platform - FastAPI, Kubernetes, RedisVL, Qdrant, Presidio, OPA, LangChain, PostgreSQL, Neo4j

- Built a multi-tenant LLM gateway handling request routing, cost governance, and enterprise safety at scale for AI applications.
- Cut API costs by 30% with a hybrid semantic cache (RedisVL); enforced PII masking (Presidio) and token budgets (OPA); added a Knowledge-Augmented Generation (KAG) layer on Neo4j for structured reasoning.

NeverHold - Voice AI Platform - AsyncIO, LangGraph, Redis, Real-Time Audio Streaming, STT/TTS

- Real-time voice AI platform for asynchronous customer interaction with conversation-state, interruption, and context handling across sessions.

EDUCATION

B.Tech, Information Technology

KCG College of Technology | CGPA: 8.05

2025

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (2025)
