SUMMARY

Software Engineer with 2+ years of experience building production-grade backend systems, observability platforms, and event-driven microservices on Azure and Kubernetes. Currently an AI Agent Software Developer at Ericsson, shipping agentic AI and Java backend platforms; previously owned 2 production AI systems end-to-end at Anunta. Microsoft Certified Azure AI Engineer Associate.

WORK EXPERIENCE

AI Agent Software Developer

May 2026 - Present

Ericsson | Chennai, India

- Designed and shipped a release-note automation system from scratch, now adopted team-wide, eliminating manual release documentation effort; built a LLD generator that auto-derives design documentation from Java codebases.
- Deliver AI Agent and Java backend engineering for internal telecom platforms, partnering with cross-functional teams to embed agentic AI into existing software workflows.
- Conducted GenAI and Agentic AI enablement sessions for 45+ senior engineers; self-initiated a Voice AI assistant integrated into SDLC workflows as an end-to-end agentic design proof-of-concept.

Software Engineer

Jul 2024 - Apr 2026

Anunta Technology | Chennai, India

- DesktopReady (DaaS):** Engineered multi-tenant backend microservices for an Azure-based Desktop-as-a-Service platform - automating VM lifecycle, user provisioning, and Active Directory sync using Go, FastAPI, and Pydantic across 500+ virtual desktop sessions. Built DeskMate, a local-inference agentic desktop assistant on vLLM.
- Event-Driven Architecture & Log Pipeline:** Architected asynchronous messaging with Kafka and RabbitMQ, reducing inter-service latency by 25%; designed a high-throughput log ingestion pipeline
- Incident Resolver (AIOps Platform):** A production AIOps platform (FastAPI, AutoGen, RAG, Qdrant, Azure OpenAI) that autonomously triages incidents and executes resolution workflows, reducing manual engineering intervention by 40%.

Software Engineer Intern

Jan 2024 - Jul 2024

Xendworks | Chennai, India

- Built secure RESTful APIs with OAuth 2.0 and Role-Based Access Control (RBAC) for sensitive enterprise data modules; shipped a Flutter app to 1,000+ active users with 20% engagement growth.

TECHNICAL SKILLS

Languages: Python, Go (Golang), Java, SQL, JavaScript

Backend & Systems: Microservices, FastAPI, Kafka, RabbitMQ, asyncio, SQLAlchemy, Pydantic, OAuth 2.0, System Design

Cloud/DevOps: Docker, Kubernetes, Azure, AKS, Git, Linux, CI/CD, Jenkins

AI / ML: LangChain, LangGraph, AutoGen, MCP, Agentic AI, RAG, Azure OpenAI, Voice AI, vLLM, LoRA/PEFT

Databases & Governance: PostgreSQL, MongoDB, Redis, Qdrant, ChromaDB, Neo4j, OPA, Presidio

PROJECTS

Aegis | Centralized Gateway & Governance Platform

- Built a high-performance multi-tenant LLM gateway in Go and FastAPI for request routing, rate limiting, and cost governance; integrated Prometheus metrics and Splunk dashboards; cut API costs by 30% with a hybrid semantic + exact-match cache (RedisVL); enforced PII masking (Presidio) and token budgets (OPA); deployed on Kubernetes with Qdrant, PostgreSQL, and a Neo4j knowledge-graph layer.

FlowState | Autonomous Multi-Agent Orchestration

- Designed a DAG-based workflow engine with parallel agent execution plus retry and rollback; built custom Human-in-the-Loop (HITL) modules ensuring 100% compliance with healthcare safety standards while automating 80% of manual verification.

Tech Stack: LangGraph, LangChain, FastAPI, Multi-Agent Systems, Python, Vue.js, FastMCP (MCP).

NeverHold | Voice AI Platform

- Real-time voice AI platform for asynchronous customer interaction, handling conversation state, interruptions, and context across sessions.

Tech Stack: AsyncIO, LangGraph, Redis, Real-Time Audio Streaming, STT/TTS.

CERTIFICATIONS

Microsoft Certified: Azure AI Engineer Associate | Microsoft

2025

EDUCATION

KCG College of Technology | Chennai

2021 - 2025

B.Tech in Information Technology | CGPA: 8.05
